Because the control condition used for the subtraction consisted of acoustically matched noise bursts, the CBF changes observed are likely specifically related to the processing of tonal information e. Perhaps they can get close enough within a tone. Same thing with pieces I've practiced a lot.

I also have a memory of readings something years ago about crowdshaving a preference for songbirds not sure about chickens have perfect pitch. David Livianu was born in Romania in ; he emigrated with his parents to America in and grew up in Brooklyn, NY. They should do a collab with this bird, which swallowed its modular synth, apparently.

Could be as easy explained as muscle memory. Translation by Christopher Aruf
