Fermat himself could not have used such methods in the proof he said he had, but he did not write it down because he didn't have enough space in the margin in which he was writing notes. Ian Nicholas Stewart FRS born 24 September is a professor of mathematics at the University of Warwick, England, and a widely known popular-science and science-fiction writer. There is a section on famous mathematicians who aren't famous for being mathematicians.

As a 70 something challenging my brain, I find this melange to be fascinating, challenging, and at times overwhelming, but never dull. A lot of it does not have to do with numbers; mathematicians may forever be associated with numbers and counting, but it is the logic and the study of patterns that occupies higher math, and a lot of that higher math can be brought down to earth for entertainment purposes, as Stewart has done here repeatedly.
