This is a grammatically correct English sentence that is self-contradictory. We split the set of villagers into two parts and look to see if the barber is on the right or left. Our description entails a contradiction with the barber. It is wrong to argue that if Y is true, then X must also be true, just because the Y is true. If a sentence does talk about a sentence that is on its own level, that sentence is proclaimed meaningless. So far for the dark side of paradoxes that play tricks on us. In the early 20th century, the mathematician G. The crocodile dilemma serves to expose some of the logical problems presented by metaknowledge.
