Equally, you are expected to obey the rules of not downloading copyright-protected materials. As a result, the user downloads the majority of the data from peers, eliminating the additional bandwidth cost to deliver the stream from the CDN or the origin server.

The different models can be depicted like this: . If the requirement today is

And this is especially true for the growing market

Peer-to-Peer Video Streaming video streaming and

video-on-demand. If anyone in the open source community is able to provide some insight, please make a pull request on our GitHub repo. The next technical challenge is to address scale, quality and cost in video streaming.

Critics of P2P unicast technology also often cite quality of video delivery as

other vendors are offering a P2P layer for last mile delivery.

Many P2P technologies use a WebRTC data channel to enable peer-to-peer capabilities via raw data transmissions directly between peers.
