The Journal of Clinical Endocrinology & Metabolism, Volume 99, Issue 9, . We collected extracellular leptin and adiponectin from 1) normal breast tissue of . Female athymic nude mice (BALB/c nu/nu) and FVB/N mice (6-8).

miRa directly targets the mTOR signalling pathway in breast cancer side population cells . into cells to final concentration of 50 nM, by Dhamafect 1 were subcutaneously injected into fat pads of nude mice. When tumours reached mm³, 10 mice with approxi- mately equal tumour volumes were selected for further.

Figure 1. Differential expression of miRa in human breast cancer tissues and MDA-MB cells stably transfected with CMV-miRa into nude mice. The average tumor volume of the CMV-NC group was fold.

1a). After inoculated for one week, breast tumors in nude mice developed to mm³. After one week injection, when the breast tumor size reached mm 3, nude mice were then fed with nifedipine (.. -

Biochem J Pt. Microdialysis - an in vivo technique for studies of growth factors in breast cancer. All microdialysis values are given as original raw data.

In contrast, plasma estradiol did not correlate with extracellular adipoki
Volume 1b serum levels of adiponectin have been associated with increased breast cancer risk 121415 ; thus leptin and adiponectin seem to have opposing effects in breast cancer 16
Please review our privacy policy. In clinical specimens and cell lines, mTOR was commonly overexpressed and its protein levels were statistically inversely correlated with miRa expression.

Taken together, there were 51 up-regulated and 18 down-regulated genes. In addition, in the current study, we have assessed the role of miRa in breast cancer cells, and then explored the underlying molecular mechanism responsible for miRa antitumor activity.
