This was followed by the Asian financial crisis, and it became more and more difficult to connect poor residents to the water supply network. Second, their network maintenance was more regular, and they introduced programs for carefully monitoring the quality of the water. This site uses cookies.

Pakistanisanotherexample. For example, a water source a few hundred meters away from a household in an urban setting can mean hours of waiting in line, whereas in rural areas this can be a relatively convenient solution. Some of these improvements can be attributed to Aguas Argentinas raising money for investment and maintenance by actually collecting payment for the water. Landowners as a group often benefit greatly from low water prices, because when the price of water goes down, farmland prices go up.

First, major infrastructure projects are undertaken for political rather than economic reasons. A study in Argentina showed that they were ready to pay up to three times the price officially set by the government.
